

INTERNATIONAL CONFERENCE ON FETAL GROWTH

Faculty / Keynote Speakers

Prof Sanne Gordijn

University of Groningen,
Groningen,
Netherlands

Birmingham, UK
12-13 October 2026

Short biography

Professor Sanne Gordijn is a clinician-scientist with a strong commitment to advancing maternal-fetal health through both clinical obstetrics and translational research. Her work focuses on placental pathology, fetal growth restriction (FGR), and improving the diagnosis and management of placental dysfunction. She has led multiple international consensus initiatives that established globally adopted definitions, classifications, and reporting standards for FGR and placental pathology. Her research portfolio spans systematic reviews, large cohort studies, prediction model development, and multicenter (cluster) randomized controlled trials. By bridging fundamental mechanisms, clinical practice, and implementation science, she aims to improve pregnancy outcomes and the lifelong health of mothers and children worldwide.
